About the scheme

Introducing the fund

The Fund is designed to give you financial flexibility and security both now and in retirement. Retirement may seem a long way off now, but planning how to provide for the future for you and your family is one of the most important decisions you will have to make.

Your pension from the Fund is based on the level of your pensionable salary and the length of your pensionable service. In addition the Fund provides other benefits which may be payable to your family or dependants if you die while you are still working for your employer, after you have retired or if you have a deferred pension with the Fund.

Your contribution to the Fund only goes part of the way to providing the benefits payable. In addition to your contribution, your employer funds the balance of the cost of providing your benefits under the Fund. You get tax relief on your contributions (subject to HM Revenue & Customs (HMRC) restrictions). The fund is regulated under UK pension legislation. It is separate from the employer, and its assets are held on members’ behalf by the Trustee. The Fund is fully endorsed by the Trade Unions.

How it works

The Fund is a defined final salary arrangement. This means that your benefits are calculated on the basis of length of pensionable service and your pensionable salary. In addition the age at which you retire will have an impact on the level of retirement benefits you receive, and this will be covered in more detail in the Guide for Members.

\[
\frac{1}{60} \times \text{Pensionable service} \times \text{Pensionable salary} = \text{Your annual pension at retirement}
\]

Instead of taking your pension in full, you may be able to exchange some of it for a tax-free lump sum. If you have at least two years’ pensionable service, you may be eligible to take an immediate or enhanced pension if you have to retire early due to ill-health.
