Subject to the Scheme Order being confirmed early in 2002, the earliest date that the proposed congestion charging scheme could commence is early 2003 i.e. 12 months from the confirmation. This plan therefore covers the ten year period 2003/04 to 2013/14 with particular reference to the early part of this period. It is estimated that the net revenues from the scheme will be of the order of £130m per year.

Over the early part of the ten year horizon of the Transport Strategy, it is envisaged that the net revenues from the proposed central London congestion charging scheme would help fund or bring forward improvements across Greater London with particular emphasis on the following areas:

(1) Bus network improvements to overcome unreliability and slow journey times, improve passenger information, and offer a real alternative to the car. Initiatives could include:

- Further bus priority and protection against congestion on bus routes across Greater London;
- Enhanced enforcement of bus regulations and further introduction of 24-hour bus stop clearways across Greater London;
- New orbital bus services in inner and outer London;
- New services to areas more than five minutes walk from a bus stop;
- Further expansion of Countdown; and
- Expansion of stop-specific bus timetables across Greater London.

These initiatives would help contribute to the Government's targets for reducing road congestion, increasing bus use, and reducing greenhouse gas emissions.

(Additional information is provided in the Transport Strategy - Chapter 4F – *A Better Bus Network*).

(2) Accelerating or extending accessibility improvements so that all Londoners, regardless of their mobility, can enjoy the benefits of living in, working in or visiting the Capital. Initiatives could include:

- Accelerating the introduction of accessible buses;
- More wide-spread implementation of 'bus boarder' kerb designs; and
- Enhancements to the Taxicard scheme.

These initiatives would help contribute to the Government's targets for increased bus use and social inclusion.

(Additional information is provided in the Transport Strategy - Chapter 4F – *A Better Bus Network* and Chapter 4O – *Accessible Transport*).

(3) Interchange improvements and other initiatives to improve the integration of the transport network; making it easier for people to access the public transport system via walking, cycling, taxi and private hire vehicle. Initiatives could include:

- Measures to make it easier to get to and from bus stops and on and off buses;
- Improved linkages between Tramlink and the wider south London transport network; and
- Improved integration of mainstream and community transport services and integration of taxis with other modes.

These initiatives would help contribute to the Government's targets for increased rail, light rail and bus use.

(Additional information is provided in the Transport Strategy - Chapter 4P – *Integration: The Seamless Journey*).

(4) Contributing to the costs of developing possible tram or high quality segregated bus schemes, which could provide a high quality alternative to the use of the private car, particularly for orbital journeys, and can offer widespread access improvements to town centres and regeneration areas. Initiatives could include:

- Advancing the completion of the East London Transit, Greenwich Waterfront Transit, Uxbridge Road Transit and Cross River Transit schemes;
- Making a start on possible extensions to the Croydon Tramlink network to assist the regeneration of the Wandle Valley; and
- Making a start on possible further extensions to the Docklands Light Railway, especially to facilitate regeneration.

This would help contribute to the Government's targets for reducing road congestion and rail overcrowding as well as to double light rail use.

(Additional information is provided in the Transport Strategy - Chapter 4Q- *Expanding London's Transport System: Major Projects* and Chapter 4D - *Docklands Light Railway and Croydon Tramlink*).

(5) Safety and security improvement schemes to improve personal safety during the course of a journey and to reduce transport-related crime and the fear of crime. Initiatives could include:

- Providing better lighting on streets, at bus stops, cycle parking areas, and in passenger waiting areas;
- Expansion of CCTV, help points and alarms on the bus, rail and Underground network;

- Improved staff training to help operating staff to safeguard the security of passengers and themselves;
- Expansion of 20mph zones, home zones and Safer Routes to School initiatives; and
- Expansion of the use of speed enforcement cameras to secure greater compliance with speed limits.

This would help contribute to the Government's targets to reduce crime and the number of people killed or seriously injured in road accidents and to increase bus and rail use.

(Additional information is provided in the Transport Strategy - Chapter 4P - *Integration – The Seamless Journey*).

(6) Accelerating road and bridge maintenance programmes to improve the quality of street conditions. The focus will be on the priorities identified via a three-year priority street maintenance plan.

This would help contribute to the Government's targets to maintain the strategic road network in optimum condition.

(Additional information is provided in the Transport Strategy - Chapter 4G – *Streets for All: Improving London's Roads and Streets*).

(7) Increasing late night public transport to meet the growing demands for night-time travel. Initiatives could include:

- Expansion in the frequency and coverage of the 24-hour bus network;
- Enhancing safety and security on buses via increased provision of on-bus CCTV;
- Extensions of the operating hours of the Underground, particularly at the weekend; and
- Raising more stations in London to the 'Secure Stations' standard (a Government-sponsored scheme to accredit safe stations).

This would help contribute to the Government's targets to reduce road congestion and overcrowding on the Underground and also to increase bus and rail use, and reduce crime.

(Additional information is provided in the Transport Strategy - Chapter 4C - *London Underground* and Chapter 4F - *A Better Bus Network*).

(8) Additional funding for borough transport initiatives to develop bus priority, walking, cycling, road safety and parking schemes through the Local Implementation Plan (LIP) process. Initiatives could include:

- Expansion of bus priority measures on local bus routes;
- Extension of improved pedestrian and cycling facilities;
- Development of Green Travel Plans with local schools and businesses; and
- New parking and traffic enforcement measures on local roads.

This would help contribute to the Government's targets to reduce road congestion, increase bus use, reduce the number of people killed and seriously injured, and to reduce greenhouse gases.

(Additional information is provided in the Transport Strategy - Chapter 4G – *Streets for All: Improving London's Roads and Streets*).

(9) Restructuring fares on public transport to make it more attractive and thus encourage a shift from the car, promote the more effective use of capacity, promote social inclusion, improve transport integration, and make public transport more efficient. Initiatives could include:

- Development of targeted fares options using Smartcards;
- Simplification initiatives; and
- Targeted initiatives to make fares more affordable.

These initiatives would help contribute to the Government's targets for reducing road congestion, increasing bus and rail use, and reducing greenhouse gas emissions.

(Additional information is provided in the Transport Strategy - Chapter 4B – *Fares and Tickets to Make Public Transport More Attractive*).

(10) Improvements to the walking and cycling environment to reduce dependency on the car - particularly for short trips, to reduce congestion and pollution, and improve health. Initiatives could include:

- Expansion of the implementation of pedestrian phases at traffic signal junctions where appropriate;
- Development of north to south and east to west pedestrian routes across central London;
- Expansion of high quality cycle routes; and
- Expansion of the provision of secure cycle parking facilities, particularly at shopping centres and transport interchanges.

These initiatives would help contribute to the Government's targets for improving health, reducing crime, reducing road congestion, and reducing greenhouse gas emissions.

(Additional information is provided in the Transport Strategy - Chapter 4I – *Promoting Walking* and Chapter 4J – *Promoting Cycling*).

(11) Improvements to the street environment to reduce the adverse effects of vehicular traffic, such as: noise, intrusion, poor air quality, community severance, intimidation, fear of crime and accidents, and difficulties of parking and loading. Initiatives could include:

- Expansion of Streets-for-People areas; and

- Town centre environmental improvement schemes.

These initiatives would help contribute to the Government's targets for reducing road congestion, reducing the number of people killed or seriously injured, improving air quality, and reducing greenhouse gas emissions.

(Additional information is provided in the Transport Strategy - Chapter 4G – *Streets for All: Improving London's Roads and Streets*).

During the later part of the Transport Strategy's ten year horizon, an increased emphasis is proposed on using the net revenues from the proposed central London congestion charging scheme to contribute to funding or financing transport infrastructure improvements including:

Helping develop and fund expanded Underground and rail capacity with new services across central London, together with improved orbital rail services (see Transport Strategy Chapter 4Q– *Expanding London's Transport System – Major Projects*);

New Thames Gateway river crossings (see Transport Strategy Chapter 4Q– *Expanding London's Transport System – Major Projects*);

Schemes to provide improved access to London's town centres (see proposals across Chapter 4 – *Improving London's Transport System*);

Further possible tram or high quality segregated bus schemes (see Transport Strategy Chapter 4Q– *Expanding London's Transport System – Major Projects* and Chapter 4D – *Docklands Light Railway and Croydon Tramlink*); and

Selected improvements to London's road system (see Transport Strategy Chapter 4G – *Streets for All: Improving London's Roads and Streets*).
